Project Overview

Founded in 2007, the ChangAi Children's Project operates in four villages in south-western Yunnan province which are deeply affected by disease, drug use and poverty. The Project works holistically on four levels to:

- Directly support vulnerable children.
- Enhance children's household environment.
- Improve the local community's situation as conducive to child development.
- Develop a model relevant for supporting children in poor villages across China.

From the Project's commencement in March 2008, ChangAi has a five year plan in which to work with local communities to enhance health and education opportunities for children.

Project village 3* opens Child Activity Room

In February 2009, the Changai-sponsored child Activity Room was completed in Village 3* - The first official activity, an art workshop, was held in the Activity room in April during a visit by ChangAi Beijing staff.

Project partners and ChangAi staff work with children to bead sarongs and decorate hats and T-shirts. The two large bookcases in the picture are filling with toys and books sourced through a combination of purchases by the local Women's Federation and donations from ChangAi supporters.
